BUOYS
-
ACHIEVEMENTS
SINCE 1996

+33 (0) 4 42 37 15 00 - mobilis@mobilis-sa.com - www.mobilis-sa.com

Since 1990, Mobilis has been developing mooring solutions for ships intended for all areas of the maritime world, waiting mooring, transshipment, hauling, quay extension, ZMEL mooring, ...

Reliable and 100% recyclable, each buoy is designed and optimized to measure according to the types of boats and site conditions;

Resistant to the test of time, they allow ships to anchor safely, and operators to intervene in any safety, in particular thanks to the anti-slip system.

Beyond the response to the specifications, the Mobilis teams offer a global organization by providing the complete infrastructure for packing and shipping.

Recognized for our proven and personalized engineering solutions, we are a partner of port services, river and industry to recommend, design, calculate and manufacture efficient and satisfactory solutions.
