

MOBILIS

JET 9000 QL PF6

RIVER AND SEA EQUIPMENT

MOBILIS EVOLUTION

1990

MOBILIS founded in Aix en Provence, France.

1992

First hybrid modular buoy – « JET » series.

2005

Second generation of hybrid modular buoy – « LB » and « SP » series - 100% synthetic.

2006

First range of data buoys (metocean, offshore...)

2010

Remote control and monitoring system.

2012

The MOBILIS rotomolding factory opened in France.

2014

MOBILIS created CALMAR mooring line calculation software to calculate and design mooring systems by the end user using site specific parameters.

2016

CALMAR software is accepted by IALA and available on IALA website to be downloaded and used for free.

ABOUT US

Started in 1990, MOBILIS has extensive experience in the design and the manufacture of Aids to Navigation equipment. MOBILIS's main objective is to produce a quality product that will offer a long life with good performance in extreme sea conditions. Our second objective is to significantly reduce life time maintenance costs.

MOBILIS's skilled and creative Engineering department provides continuing development of all our product range, combining technology and innovation. Our continuing development and product improvement is the result of a strong relationship between the MOBILIS team and the end users.

Located in France, MOBILIS selects raw materials based on 25 years experience in the industry; these materials prove resistant in harsh marine conditions. Our Quality department monitors each step of the manufacturing process; from raw materials selection through to the end of production, inspecting each part of the equipment produced. This quality policy brings reliability and durability to MOBILIS products for our customers and the end user.

To ensure MOBILIS's commitment to after sales services and maintenance MOBILIS has a sales network on five continents providing dedicated technical support by professionals trained on MOBILIS product specifications.

Our know-how with more than 25 years experience and our willingness to innovate by improving our products and solutions allow MOBILIS to be a world leader in Aids to Navigation equipment.

TOWERS, PYLONS AND MASTS

For fixed beacons, MOBILIS offers a complete range of pylons and masts with various sizes and shapes, covering all maritime uses. Easy to assemble and to maintain, this equipment is designed and manufactured to resist extreme environmental conditions. Their design allows easy assembly without heavy handling equipment and their deployment can be made by helicopter.

CYLINDRICAL PYLON DIAM 1,0m
Height: 7m

**HIGHT VISIBILITY MODULAR
PYLON**
Height: 15m

**MODULAR PYLON DESIGN FOR
STRONG WIND**
Height: 12m

MARINE LIGHTS

MOBILIS has selected a range of the best available lanterns:

- LED marine lanterns with low energy consumption: power consumption and luminous intensity ratio are the most efficient available,
- Marine lanterns are programmed by Bluetooth or Infrared,
- Monitoring of buoy lanterns can be made on site from a maintenance vessel by using Bluetooth (no need to climb onto the buoy),
- Lanterns can be self-contained or powered by dedicated solar or wind power systems,
- Remote marine lantern monitoring can be done by radio-link, GSM, satellite or AIS.

MOBILIS develops solutions which integrate the monitoring system of Port entry lights, fixed beacons and floating beacons with various transmission means: UHF, VHF, GSM, satellite or optical fibre.

Remote monitoring allows for real time lantern status and position using an ergonomic touch screen for each marine light.

The engineering department develops custom-made solutions to satisfy the customer's specifications and the geographical location of marine lanterns.
